

UNIVERSITY OF WESTERN AUSTRALIA

MASTER OF PHYSICS

**Gate-Level Quantum Circuits for Solving Differential
Equations via Physics-Informed Effective Hamiltonians
and GQSP-QITE**

Dhyan Patel

School of Physics, Mathematics and Computing

Supervised by

Jingbo WANG

17 August 2026

Acknowledgments

Thank you to my supervisor, Jingbo Wang, for her guidance and support throughout my research, particularly for her continual encouragement and belief in me.

I would also like to thank my family and friends for their support and encouragement throughout my studies.

Declaration

This is to certify that:

1. This thesis comprises of my original work.
2. Due acknowledgment has been made in the text to all other materials used.
3. This thesis consists of less than 60 pages inclusive of tables and figures but exclusive of references and appendices.

I authorise the Head of the Department of Physics to make a copy of this thesis to any person judged to have an acceptable reason for access to the information, i.e, for research, study or instruction.

Summary of Student Achievement

Contents

1	Introduction	2
1.1	Motivation: Quantum Algorithms for Differential Equations	2
1.2	Spectral Galerkin Method for Differential Equations	2
1.3	Thesis Contributions and Outline	2
2	Literature Review	2
2.1	Quantum Algorithms for Differential Equations	2
2.2	Physics-Informed Effective Hamiltonian Framework	2
2.3	Block-Encoding	2
2.4	Quantum Signal Processing	2
2.4.1	Basic Quantum Signal Processing	2
2.4.2	Quantum Singular Value Transformation	2
2.4.3	Generalised Quantum Signal Processing	2
2.5	Quantum Imaginary Time Evolution	2
2.6	Hadamard Test & Interferometric Measurement	2
2.7	Oblivious Amplitude Amplification	2
3	Methods	2
3.1	Chebyshev Basis and the Effective Hamiltonian	2
3.2	Block-Encoding of Operator Matrices	2
3.3	Ground State Preparation via Quantum Imaginary Time Evolution using GQSP	2
3.4	Generalisation to Broader Classes of Differential Equations	2
3.4.1	Partial Differential Equations	2
3.4.2	Nonlinear Differential Equations	2
3.4.3	Nonlinear Partial Differential Equations	2
3.4.4	Coupled Differential Equations	2
3.5	Application to Representative Problems	2
3.5.1	Black-Scholes Equation	2
3.5.2	Navier-Stokes Equations	2
3.6	Readout Methods	2
3.7	Classical Simulation of Quantum Circuits for Differential Equations	2
3.8	Classical Benchmarks	2
4	Results	2
4.1	Circuits for Chebyshev-Basis Operators	2
4.1.1	Chebyshev Feature Map	2
4.1.2	Differential Operator	2
4.1.3	Data Constraints	2
4.1.4	Net Differential Operator	2
4.1.5	Effective Hamiltonian	2

4.2	Numerical Results	2
4.2.1	Ordinary Differential Equations	2
4.2.2	Partial Differential Equations	2
4.2.3	Nonlinear Differential Equations	2
4.2.4	Nonlinear Partial Differential Equations	2
4.2.5	Coupled Differential Equations	2
4.2.6	Partial Coupled Differential Equations	2
4.2.7	Black-Scholes Equation	2
4.2.8	Navier-Stokes Equations	2
4.3	Readout Methods	2
4.4	Complexity Analysis	2
5	Discussion	2
5.1	Design Choices	2
5.2	Trade-offs in Quantum Circuit Design	2
5.3	Noisy Intermediate-Scale Quantum (NISQ) Era Feasibility	2
5.4	Limitations and Challenges	2
6	Future Work	2
7	Conclusions	2
8	References	2

Abstract

Brief summary.....

1 Introduction

1.1 Motivation: Quantum Algorithms for Differential Equations

1.2 Spectral Galerkin Method for Differential Equations

1.3 Thesis Contributions and Outline

2 Literature Review

2.1 Quantum Algorithms for Differential Equations

2.2 Physics-Informed Effective Hamiltonian Framework

2.3 Block-Encoding

2.4 Quantum Signal Processing

2.4.1 Basic Quantum Signal Processing

2.4.2 Quantum Singular Value Transformation

2.4.3 Generalised Quantum Signal Processing

2.5 Quantum Imaginary Time Evolution

2.6 Hadamard Test & Interferometric Measurement

2.7 Oblivious Amplitude Amplification

3 Methods

3.1 Chebyshev Basis and the Effective Hamiltonian

3.2 Block-Encoding of Operator Matrices

3.3 Ground State Preparation via Quantum Imaginary Time Evolution using GQSP

3.4 Generalisation to Broader Classes of Differential Equations

3.4.1 Partial Differential Equations

3.4.2 Nonlinear Differential Equations

3.4.3 Nonlinear Partial Differential Equations

3.4.4 Coupled Differential Equations

3.5 Application to Representative Problems

3.5.1 Black-Scholes Equation
